PROFILE INFO

A motivated and results-driven professional with a strong foundation in analytical thinking, problem solving, and data interpretation. Skilled at transforming complex information into actionable insights to support decision-making. Committed to continuous learning and personal growth, with a proactive approach to tackling challenges and delivering value to organizational objectives.

EXPERIENCE

DHS- AFRICA 09/2025 – 01/2026
JUNIOR SOFTWARE ENGINEER

- Contributed to the design and development of user interfaces for the company's digital health platform.
- Mainly implementing responsive and user-friendly layouts, improving UI performance, and collaborating with backend developers to ensure seamless integration.

AIRQO 07/2025 – 09/2025
TECHNICAL OPERATIONS INTERN

- Supported technical operations by coordinating deployments, managing devices, and ensuring smooth data collection for air quality monitoring. I also contributed to system testing and community engagement through events and training.

SUNBIRD AI 06/2025 – 07/2025
SOFTWARE ENGINEERING INTERN

- Gained hands-on experience working with LLMs and geospatial data. Contributed to fine-tuning and evaluating LLMs for real-world applications like Sunflower system and developed tools to support NLP tasks. I also explored the integration of geospatial insights with AI models, enhancing data-driven decision-making and mapping capabilities in development contexts.

EDUCATION

Bachelor of Science in Computer Science 2023 – 2027
MAKERERE UNIVERSITY

Uganda Advanced Certificate of Education 2020 – 2022
SEETA HIGH SCHOOL, MUKONO

Uganda Certificate of Education 2016 – 2019
UGANDA MARTYRS' SS NAMUGONGO

SKILLS

- Attention to detail
- HTML and CSS
- Team collaboration
- DevOps Tools
- Web Development, UI/UX Design
- MySQL, Agile
- UI/UX Design
- TensorFlow and MediaPipe
- Programming languages
- Cloud Platforms
- Time management
- LLM fine-tuning and NLP

CERTIFICATES AND TRAINING

- Innovation Excellence Award by Makerere and the Ministry of ICT
- Diploma in Machine Learning
- Zoho Creator by Young Creators Program
- Bootcamp Training in Software Development by Women Techsters
- AI and ML application by Africa Agility
- Microsoft Cloud Demystified Challenge and Student Ambassador
- Event coordinator- Google Developer Groups on Campus(Makerere)

PROJECTS

Sunflower Multilingual AI Project – Sunbird AI

06/2025 – Present

- Contributed to the development and evaluation of multilingual AI models for African languages through data collection, annotation, and NLP model training.
- Collaborated with researchers and engineers to improve model accuracy and build AI solutions for underrepresented languages.

Air Quality Monitoring and Prediction Project – AirQo

- Contributed to machine learning workflows for air quality monitoring and prediction through data preprocessing, validation, and analysis of environmental and sensor datasets.
- Supported model testing and evaluation to improve prediction accuracy while gaining hands-on experience in AI and environmental data systems.

Sign Language Tutor Application

- Designed and developed a Flutter-based mobile application for learning sign language using interactive lessons, quizzes, and visual demonstrations.
- Integrated AI/ML models to enhance learning experience and support intelligent content delivery and feedback.
- Implemented accessible UI features and applied full software engineering practices.
